

The Environmental Physiology Laboratory in the Department of Automation, Biocybernetics and Robotics at the Jozef Stefan Institute (Ljubljana, Slovenia) is accepting applications from students wishing to pursue a doctoral degree. Current research in our laboratory focusses on Space Life Sciences (www.planhab.com) and Industrial Heat Stress (www.heat-shield.eu). Candidates with an average grade of 8.0 or more are welcome to apply. Successful candidates will become limited term employees (for the duration of their PhD work) of the Jozef Stefan Institute, and will receive a salary and all associated benefits (medical insurance, pension plan, etc.).

For more information, please contact igor.mekjavic@ijs.si

This offer closes August 5th, 2016

Applications through JSI portal
